## The *BIOlogically exact* MEDICINE

*The relation between body and mind in medicine according to the five Biological Laws, discovered by Dr. Ryke Geerd Hamer*

## V° INTERNATIONAL CONGRESS CASE STUDIES

Assisi  
14<sup>th</sup> - 16<sup>th</sup> October 2011

Venue:  
LYRICK THEATRE  
Assisi

# The five biological laws

The most recent discoveries in neuroscience and biophysics not to mention the knowledge that emerges from the various aspects of the holistic cultural observations prove that we are amid an era of a radical change of paradigm regarding the comprehension of mankind and especially the origins of health and disease.

The conclusions of Ryke Geerd Hamer which date back to the beginning of the eighties and are summarized as the five "biological laws", are a fundamental contribution to the research of psychosomatics and specifically to the research of the connections between psyche, brain and organs.

This system of genesis and nature of disease represents a model, founded on the essential connection of "mind and body" but, at the same time, has the potential to explain in a psychogenetic way the event which can lead to disease, also for newborns and animals.

This congress has the goal to help create a sensibility, a new way of observing the ailing individual and outline a subsequent new manner of handling therapy where conventional and non-conventional knowledge are integrated to support the diseased person.

## The ALBA Association

The ALBA (Associazione Leggi Biologiche Applicate) association was founded in 2003, with the objective to research and study the correct application of the Five Biological Laws of nature, discovered by M.D. Ryke Geerd Hamer. It does not have any external ties with political, religious or any other type of affiliations.

The activities of the association is targeted towards studying, researching and then distributing their findings, as well as making efforts for this discoveries to be acknowledged by the authorized institutions on national and international level.

This is why it concentrates on the study and applications of clinical methodologies with respect to medical scientific progress and promotes encounters, conventions, seminars and training courses for a precise and scientific communication of the 5 Biological Laws.

## Agenda

The work sessions will focus on video documents of eyewitness accounts of case studies. Speakers will illustrate and comment the different pathologies and show the diagnostic, clinical and therapeutic aspects used in handling the specific situations.

### Friday, 14<sup>th</sup> October

(14.30) WELCOMING AND OPENING.

(15.00-17.00) Introductory explanation of the application of the five biological laws so as to better understand the case studies. Presentation of a case study.

(17.30-18.30) Therapeutic compliance: the importance of emotional security and treatment accuracy. Presentation of a case study.

### Saturday, 15<sup>th</sup> October

(09.00-11.00) Presentation of case studies using video documents.

(11.30-13.30) Psychological disorders in the light of the five biological laws: analysis of "schizophrenic constellations".

Presentation of a case study.

MIDDAY BREAK

(15.00-17.00) The dynamic interplay between physical and psychological symptoms.

(17.00-17.30) Presentation of a case study.

(17.30-18.30) ROUND TABLE: Mind and body in medicine - contributions to a new scientific paradigm.

GALA DINNER

### Sunday, 16<sup>th</sup> October

(09.30-11.30) Presentation of case studies using video documents.

(12.00-13.00) ROUND TABLE: Dignity and freedom of choice in therapy - networks of cultural models

(13.00-13.30) CLOSURE. Final debate and conclusions.
